

SOUTHERN BOULEVARD BRIDGES REPLACEMENT PROJECT

Project Update
Friday, June 21, 2019

Please be advised the eastbound lane of the Southern Boulevard Temporary Bridge will be closed from 7 p.m. Sunday, June 23, to 6 a.m. Monday, June 24, for a concrete pour of a main bascule pier. Flaggers will maintain two-way traffic – one direction at a time – in the westbound lane.

The Southern Boulevard (SR 80) Bridges Replacement Project includes replacing the existing bascule (draw) bridge and tide relief bridge over the Intracoastal Waterway (ICWW) and Lake Worth Lagoon between the City of West Palm Beach and the Town of Palm Beach. The project limits are between Washington Road in West Palm Beach and State Road A1A/South Ocean Boulevard in Palm Beach. New decorative lighting, pedestrian features, traffic signals, signage and drainage are included. A temporary bridge has been built north of the existing bridge to maintain traffic while the replacement bascule bridge is under construction. Active construction began April 3, 2017 and will last until early 2021. The estimated construction cost is \$93 million.
