

PALM BEACH FIRE RESCUE

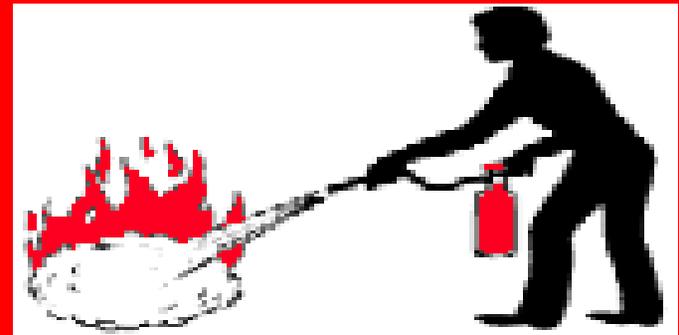

COMMUNITY EDUCATION PROGRAM

LEARN TO SAVE A LIFE

Sudden Cardiac Arrest (SCA) is the leading cause of death in the United States. Without emergency help, SCA can lead to death within minutes. Knowing how to administer CPR and use an AED (Automated External defibrillator) is essential for any chance of recovery.

Seconds are critical when making a decision about fires. Understanding the procedures for operating a fire extinguisher, as well as the ability to determine if fires can be put out or if a person needs to get out can save their life and the lives of others.

PALM BEACH FIRE RESCUE CAN HELP YOU LEARN THE SKILLS YOU NEED TO SAVE A LIFE.

We are currently offering CPR/AED, First Aid and Fire Extinguisher Training.

Please contact our Community Education Coordinator at 561-838-5420 for more information.
